EDUCATION

Master of Science in Computer Science (Integrated Program)
University of Minnesota-Twin Cities

Expected May 2027
Minneapolis, MN

Bachelor of Science
University of Minnesota-Twin Cities
Majors: Computer Science, Data Science
Minor: Statistics
GPA: 3.967/4.00

Expected May 2026
Minneapolis, MN

WORK EXPERIENCE

Software Developer Intern

May 2025-Aug 2025

ImageTrend, Eagan, Minnesota – Public Health SaaS

- Designed and implemented a full-stack geocoding data visibility and control application with a Windows service API using C# and .NET Core.
- Created an interface for managing geocoding data sources and viewing logs using React and Material UI.
- Refactored legacy code to improve performance and integrate latest features.
- Achieved 100% unit test coverage across backend and frontend components.

Sales Advisor

July 2021-April 2023

Best Buy, Maple Grove, Minnesota – Electronics Retail

- Trained new employees in technical aspects of mobile device activation and setup.
- Provided technical support for customers by using critical thinking skills to ease concerns.

RESEARCH EXPERIENCE

Undergraduate Research Assistant

May 2025-Present

University of Minnesota-Twin Cities, Knowledge Computing Lab – AI/ML Research

Mentor: JangHyeon Lee, Advisor: Yao-Yi Chiang

- Finalizing paper on a CLIP-based model to identify solar storms using multimodal satellite imagery and descriptive text.

PUBLICATIONS

Peer-reviewed Abstracts

Nathan Stangler, JangHyeon Lee
“SolarCLIP: A Vision-Language Model for the Sun”
AAAI, 2026

SELECTED PROJECTS

Truncate, Personal Project

Summer 2025

- Built a full-stack URL shortener and analytics platform using React, TypeScript, Go (Fiber), and PostgreSQL.
- Implemented detailed analytics, including redirect tracking, geolocation, device, and browser statistics.
- Secured user data with JWT authentication and role-based access control.

Improved Scoreboard, Personal Project

Summer 2024

- Designed and developed a scalable, object oriented, and event driven Minecraft network packet-based scoreboard plugin compatible with multiple game versions.
- Integrated with third-party applications through the creation of a portable scoreboard management API.

Daily Rewards, Personal Project

Fall 2020

- Developed and commercially launched a fully configurable daily rewards system for Garry's Mod, generating 100+ sales on Gmodstore.
- Integrated MySQL and SQLite database support, with seamless interaction from a custom designed user interface using client-server communication through networking protocols.

ACTIVITIES

Member, University of Minnesota Robotics

September 2023-May 2024

- Contributed to the creation and design of an autonomous robot for the NASA Lunabotics competition using NVIDIA Isaac ROS libraries.
- Collaborated with group members to develop and debug a heightmap conveyor belt detector and a visual based position estimator.

AWARDS AND HONORS

Dean's List, University of Minnesota, Minneapolis, MN, 2023-Present

SKILLS

Languages: Java, Python, C, C#, SQL, JavaScript, TypeScript, HTML, CSS, JSON, XML

Frameworks/Libraries: PyTorch, NumPy, Pandas, React, Jest, JUnit, Mockito, Git
